OBJECTIVE

AWS Cloud & DevOps enthusiast with hands-on experience in EC2, VPC, IAM, Application Load Balancers, Auto Scaling Groups, CloudWatch Monitoring, Linux and Git. Built end-to-end AWS projects focused on scalability, monitoring and high availability. Seeking internship and entry-level opportunities in Cloud Computing and DevOps.

TECHNICAL SKILLS

- Cloud Platforms: AWS (EC2, VPC, IAM, S3, RDS, EBS, ALB, Auto Scaling, CloudWatch, Route 53, CloudFront)
- DevOps Tools: Jenkins, Terraform, Ansible, Git, GitHub
- Containerization & Orchestration: Docker (Learning), Kubernetes (Learning)
- Operating Systems: Linux (Amazon Linux, Ubuntu), Windows
- Web Servers: NGINX, Apache
- Monitoring Tools: Amazon CloudWatch
- Programming & Scripting: Java, Python (Basic), SQL, Bash (Basic)

Cravita Technologies Pvt. Ltd. – DevOps Intern

Jan 2026 – Present

- Worked on AWS infrastructure (EC2, S3, VPC, IAM).
- Provisioned resources using Terraform.
- Built CI/CD pipelines with Jenkins and GitHub.
- Automated deployments using Ansible.

EDUCATION

BrihanMaharashtra College of Commerce

Bachelor of Business Administration in Computer Applications (BBA/CA) CGPA: 7.1 2025-2026

New Look Senior Secondary School

Higher Secondary Education (12th) Percentage: 71% 2021-2022

MSB Educational Institute

Secondary Education (10th) Percentage: 70% 2020-2021

CERTIFICATION

Master In Cloud Architecture - [Fortune Cloud technologies-2026] 2025-2026

Project Experience

Disaster Recovery System

- Implemented Disaster Recovery using EC2 Snapshots and AMIs for backup and recovery.
- Configured S3 Versioning and monitored resources using Amazon CloudWatch.
- Automated AWS infrastructure provisioning using Terraform.
- Tools Used: AWS (EC2, AMI, Snapshots, S3, CloudWatch, IAM), Terraform, Linux

Three-Tier Web Application on AWS

- Designed and deployed a Three-Tier Architecture in a custom VPC using Public and Private Subnets.
- Hosted the application on EC2 with NGINX and configured Amazon RDS as the database.
- Configured Security Groups, Internet Gateway and NAT Gateway for secure communication.
- Tools Used: AWS (EC2, VPC, RDS, IAM), NGINX, Linux, Git

DevOps CI/CD Pipeline

- Built a Jenkins CI/CD pipeline integrated with GitHub for automated deployments.
- Automated infrastructure provisioning using Terraform and server configuration using Ansible.
- Configured SSH-based deployment and monitored infrastructure using Amazon CloudWatch.
- Tools Used: Jenkins, Git, GitHub, Terraform, Ansible, AWS (EC2, CloudWatch), Linux, SSH
